

Suresh M

SKILLS

Programming: Python

Web: HTML, CSS, JavaScript

Frameworks & Tools: Django, Fast API, DRF, LangChain, SQLite3, Git, GitHub

Libraries: NumPy, Pandas, Matplotlib, Seaborn, OpenCV, Plotly

AI & ML: FAISS, ChromaDB, OpenAI Embeddings, Elasticsearch, Prompt Engineering, RAG, NLP, LLM, TTS, STT models, Image-to- Text Conversion, etc.

DevOps & Infra: AWS EC2, Ubuntu, Web socket, Docker

CERTIFICATION

Full Stack Developer course – IDM Techpark, Coimbatore (2024)

Machine Learning, Deep Learning and Natural Language Processing with Python (Jovian Platform)

EDUCATION

M.sc. (Mathematics)

Periyar University | 2021–2023 | CGPA: 8.1

STRENGTHS

Expertise in AI/ML and GenAI feasibility, mapping business requirements to validated, cost-efficient solution architectures.

Proficient in designing scalable AI/ML systems and automating data workflows.

Gen AI Engineer | Python Full-Stack Developer

sureshmrs2821@gmail.com | +91 6382517739 | [LinkedIn](#) | Coimbatore, TN

SUMMARY

AI Engineer and Python Full Stack Developer skilled in building intelligent, scalable web and AI solutions. Experienced in RAG systems, chatbot development, and automation using Python, Django, LangChain, and OpenAI APIs. Passionate about applying AI to real-world problems.

EXPERIENCE

AI Engineer - Qube Space LLP, Coimbatore *Sep 2024 – Nov 2025*

Developed AI models and integrated them into web applications. Worked on machine learning pipelines, data preprocessing, RAG pipelines and model deployment in Python.

Process Executive - Cognizant, Coimbatore *Aug 2022 – Aug 2024*

Handled US healthcare claim processing with accuracy and adherence to compliance standards.

Key Projects

AI Education Platform

Technologies: Python, Django, LangChain, FAISS, SentenceTransformers, OpenAI API (gpt-4o-mini)

An intelligent classroom platform empowering teachers to deliver interactive lessons with AI-powered content generation.

- **AI Explanations & Examples:** Auto-generates topic-based explanations and real-world examples, Image from textbook content.
- **AI Tutor Chatbot:** Answers student queries using contextual retrieval from embedded PDFs via RAG; supports voice-to-voice responses with the GPT-4o Realtime model.
- **AI Exams:** Built an AI-based exam platform enabling teachers to generate questions and students to answer through voice, written. Integrated automated evaluation using textbook data for scoring.
- **Live AI Poll:** Provides real-time classroom polling and analytics for interactive learning sessions.

Enterprise RAG Chatbot Solutions

Technologies: Python, Django, LangChain, Elasticsearch, OpenAI GPT-4o-mini, Microsoft SharePoint, OpenAI Whisper API.

Designed and deployed a Conversation Retrieval Chain with conversation buffer memory to power multi-turn, context-aware **RAG** chatbots with voice capabilities.

- Integrated **SharePoint document management** with automatic re-indexing every 3 hours using cron job.
- Migrated chatbot infrastructure from IBM Watson to OpenAI-based systems, cutting operational costs.

Achievements & Impact :

- Delivered \$300/month cost savings
- Achieved 40% reduction in search latency(Previously using Watson Discovery)

Forms Compare – AI Document Comparison Tool

Technologies: Python, Gemini Flash 2.0, PyMuPDF, Elasticsearch, Django

An AI-powered tool for policy and form document comparison, identifying clause-level differences, missing sections, and semantic variations.

- Engineered intelligent AI system for policy forms document comparison
- Implemented advanced text extraction and semantic analysis
- Designed and optimized an Elasticsearch index and query strategy to enable fast retrieval of structured clause-level differences.
